BES Group

Engineering Inspection services from BES Group

**Keeping your customers
safe and legally compliant**

Who we are and what we do

BES Group has over 160 years of experience in keeping people safe and businesses compliant and are proud to support over 35,000 customers. Our expert engineer surveyors ensure your customers' assets remain safe, compliant and efficient, while helping to minimise downtime, prevent breakdowns, and extend equipment life.

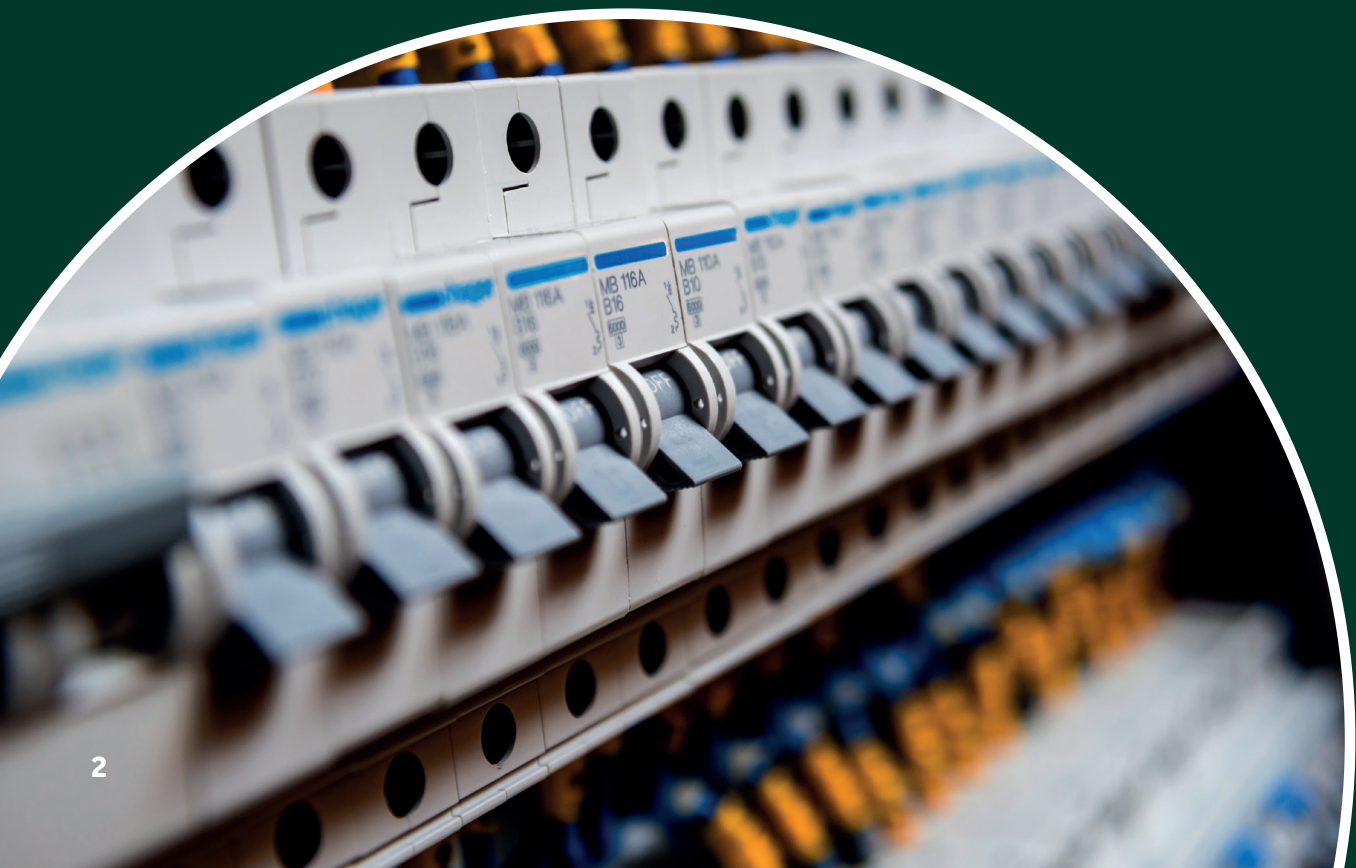

As well as traditional Engineering inspections, we've grown to offer a broader range of services including:

- ✓ Electrical inspection and testing services
- ✓ Electric vehicle chargepoint installations
- ✓ UKAS accredited material testing
- ✓ Condition Based Monitoring services
- ✓ Structural monitoring solutions

At BES, we're committed to ensuring the highest quality engineering inspections are delivered on time, every time, to keep your customers safe and legally compliant.

As one of the few UKAS Type A accredited inspection providers in the UK and Ireland, we'll make sure your customer's equipment is inspected to the very highest standards through our team of over 600 engineers.

With the launch of the Paul Forrester Training Centre, we're proud to have our own unique, industry-leading facility that enables us to effectively align our training plans to your customer's needs.

Why **brokers** work with us

At the BES Group, our goal is to make trading with us simple and effective.

Our team of Broker Development Managers are experts in helping brokers grow their inspection business. They can help you identify new opportunities to offer inspection services to more customers and provide you with specialist training on legislation, inspection services, and Sudden and Unforeseen Damage Insurance coverage. They can also train your teams to use our E-Trade platforms.

We offer competitive pricing to your customers and a range of remuneration options for your business.

Online Trading Tools

With Acturis and BERT (our extranet E-Trade system), we've ensured we have solutions that meet your needs.

From accessing quick quotes to managing renewals, our E-Trade platforms let you:

- ✓ Create and accept new business quotes
- ✓ Select assets from simple drop down lists
- ✓ Process renewals early
- ✓ Access documentation instantly
- ✓ Include optional Sudden Unforeseen Damage insurance cover

Our service to **your** customers

We know that sometimes customers are concerned about the impact of changing inspection providers. That's why we've developed processes that are unique to the BES Group to ensure that customers new to our business have a seamless transition.

Planning

Our award-winning approach to planning guarantees customers' needs are met, providing:

- ✓ Flexible scheduling around customers' business hours
- ✓ Online booking portal
- ✓ Adaptive re-planning for unforeseen circumstances

...And E-Report

Powered by cutting-edge technology, our cloud-based E-Report system enables you and your customers to access inspection data shortly after our engineers finish their examination.

- ✓ Access most reports within 15 minutes of the inspection
- ✓ Full history of previous reports
- ✓ See future due dates and planned inspection dates
- ✓ Track defects and 'Plant Not Available' (PNA) reports

Industry Leading Insights

Our data analytics service can help to make a difference for your customers and their business. By profiling plant performance, we can help to minimise risks, enhance quality, and safeguard your customers' property.

Our Engineer Surveyor App

Through the use of the very latest technology, our engineers can help customers in other ways:

- ✓ Geo-location tagging of items that can be given to customers
- ✓ Real-time access to any specific customer requirements for site visits
- ✓ Comprehensive audit trail with our inspection photo library

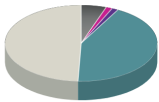

Making Our Continued Growth Work for You

Partnering with the BES Group gives you peace of mind that your customers are supported by the most technically qualified and accredited business in our industry.
